

MD. RAJU AHMED

Full Stack Web Developer

Rajshahi, Bangladesh · Open to Dhaka on-site or remote, GMT+6 · +880 1315 152005 · iamraju705@gmail.com
rifatsarkerraju.com · github.com/Raju0131

Full stack developer building production web applications end to end — schema design, API layer, frontend and deployment. Core stack is Next.js, React, TypeScript, Node.js, Prisma and PostgreSQL, with a specialism in real-time 3D and interface motion on the web. I work async-first: written scope up front, a live demo link at every milestone, and progress updates in writing rather than standing calls.

SELECTED PROJECTS

Premium Hatbazar — Bengali-First E-commerce Store premiumhatbazar.vercel.app

Next.js 16 · React 19 · TypeScript · Prisma · PostgreSQL (Neon) · Tailwind CSS

- Storefront, checkout and order tracking in Bengali. Customers pay by bKash, Nagad or Rocket Send Money and enter the transaction ID; each order gets a readable code such as PH-482193.
- Admin panel for orders, products and customer chat, behind HTTP Basic Auth. Every server action re-checks the login, and the panel stays locked when no password is set.
- Prerendered pages refreshed after each admin edit, and WebP images at three widths (30–40 KB instead of a 1.4 MB PNG): Lighthouse 100 on desktop, about 90 on mobile, accessibility 100.
- Built solo; public code with a README on the schema and system design: github.com/Raju0131/Premium-Hatbazar

Sneaker Lab — Real-Time 3D Product Configurator 3d-bay-ten.vercel.app

Three.js · WebGL · React · Next.js · TypeScript

- Browser-based configurator: orbit a sneaker model, swap colourways and materials, and export a render — entirely client side, no page reloads.
- Wrote a luminance-preserving tint pipeline that recolours a baked-texture model at runtime while keeping fabric weave and shadow detail intact.
- Reduced the model from 16.7 MB to 2.4 MB — an 86% cut — using Draco compression, bringing first load into range for mobile connections.
- Priced material options update the cart total live, mirroring a production ecommerce flow.

Cinenest — Movie Discovery Application rifatsarkerraju.com/work/cinenest

React · Next.js · GSAP · TMDB API

- Dynamic per-film routing across the TMDB catalogue with live search over titles.
- Staged GSAP page transitions and a design system built from scratch rather than assembled from a component library.

TECHNICAL SKILLS

Frontend React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

Backend & Data Node.js, Next.js Server Actions, Prisma, PostgreSQL, REST APIs, authentication, mobile-wallet payments

3D & Motion Three.js, WebGL, Draco compression, GSAP, Lenis

Workflow Git, Vercel, responsive design, performance optimisation, written client updates

EDUCATION

Rajshahi College — BBA in Accounting — in progress, 2023 to present

Rajshahi University School & College — Higher Secondary Certificate — 2022

LANGUAGES

Bengali (native) · Hindi (fluent) · English (fluent written, conversational spoken)
